

The Makeover Maven Returns

Before and after examples from patron-submitted work

JULIE TERBERG

Generous conference patrons have submitted their own slides for this makeover session. You will see many different types of real-world “before” slides along with the transformed “after” slides. We’ll walk through makeovers, discuss the changes (and reasons for the changes), make suggestions for further improvement, and share ideas that you can apply to your own makeovers.

A successful presentation makeover is more about deconstruction and simplification, rather than embellishment. Remove extraneous details and leave only what is necessary for clear, visual communication. While reviewing the makeovers, we’ll discuss and demonstrate simplification and clarity, along with other tips for successful makeovers such as:

- Improving slide layout designs
- Developing style consistency
- Using custom slide layouts
- Editing complex slides for better communication
- Designing visual concepts

During this session, you'll see a wide variety of before and after examples and learn how to apply the techniques to your own presentations.
